

src/data/delimitedstringvalidator.h

```
graph TD; A[src/data/delimitedstringvalidator.h] --> B[QObject]; A --> C[QValidator];
```

The diagram illustrates a header file, `src/data/delimitedstringvalidator.h`, which serves as a base for two classes: `QObject` and `QValidator`. Two blue arrows point from the header file box down to the `QObject` and `QValidator` boxes, indicating that the header file defines or inherits from these classes.
