

QObject

```
classDiagram
    class QObject {
    }
    class TestTikzOutput {
    }
    TestTikzOutput --|> QObject
```

The diagram illustrates a class hierarchy. At the top is the 'QObject' class, represented by a rectangle divided into three horizontal sections. The top section contains the text 'QObject', while the two sections below are empty. Below 'QObject' is the 'TestTikzOutput' class, also a rectangle divided into three horizontal sections. The top section of 'TestTikzOutput' contains the text 'TestTikzOutput', and the two sections below are filled with a light gray color. A blue arrow, with a hollow triangular head, points from the top center of the 'TestTikzOutput' class to the bottom center of the 'QObject' class, indicating that 'TestTikzOutput' inherits from 'QObject'.

TestTikzOutput
